

Telia Rehti service description

This service description tells you what your service includes.
The service description is part of your Telia Rehti agreement.

Telia Rehti (hereafter “the subscription”) is a consumer mobile subscription provided by Telia Finland Oyj (“hereafter “Telia”) for internet access, calls and messages. The subscription can be used on a mobile phone or a tablet device. The subscription cannot be owned by a company and the invoices cannot be addressed to a company.

General description

Unlimited data in Finland is always included in Telia Rehti. For calls and messages, you may choose between different packages or a usage-based pricing plan. The subscription charge depends on the selected service configuration.

The data, call and message packages included in your subscription apply for the most part also in other EU/EEA countries*. In Scandinavia and the Baltic States (Sweden, Norway, Estonia, Latvia and Lithuania), you can only use Telia Company networks**.

Your message package also includes SMS and MMS messages from Finland to Nordic and Baltic countries*** (Sweden, Norway, Denmark, Estonia, Latvia and Lithuania).

Any traffic exceeding what is included in the call and message package in Finland and in other EU/EEA countries is subject to the listed domestic prices, provided that the recipient is in the EU/EEA area.

Call prices

- Subscription's normal-priced calls are charged in Finland and other EU/EEA countries according to domestic pricing.
- The voice package includes normal-priced calls in Finland to mobile phone numbers.
- Calls to normal-priced landline directions are not included in the voice package but are charged according to the price list in force at the time.
- Receiving calls is free of charge in EU/EEA countries.
- In a pay-as-you-go subscription, normal priced calls and messages from Finland to the Nordic and Baltic countries are charged according to domestic pricing (when the call is made, or the message is sent to Telia Company countries)
 - The pricing applies to calls from Finland to Telia Company's countries with international codes +, 00 and 990.
- Please note that calls from Finland to abroad are subject to the current international price list.

Message prices

- The subscription includes normal-priced SMSs and MMSs in Finland and normal-priced SMSs from Finland and other EU/EEA countries to EU/EEA countries.
- Normal-priced SMSs and MMSs from Finland to Nordic and Baltic States (to a Telia Company country) are included.
- MMSs sent from an EU/EEA country consume your available data.
- Receiving messages is free of charge in EU/EEA countries.
- Please note that messages from Finland to countries outside Scandinavia or the Baltic States are subject to the current international price list.

Internet service pricing plan

- The subscription includes unlimited surfing in Finland. Some of the subscriptions

Telia Rehti

service description

- also include unlimited surfing in the Nordic and Baltic countries
- The monthly charge of the subscription includes surfing in other EU/EEA countries at a selected transmission speed until the maximum data transmission volume included in the package is reached.
- When the monthly volume of data transmission is reached within the EU/EEA countries, the customer can continue surfing at a per-day charge. The charge per day includes the volume of data indicated in the pricelist at the normal speed. If you exceed this volume, you can continue surfing at the basic network speed (128 kbit/s) until the beginning of the next day, when the data transmission rate will be raised back to normal.

About pricing

- The rates shown above apply only to calls and messages to normal-priced mobile phone numbers.
- The subscription does not include calls and messages to service or company numbers and other premium-rate numbers, but they are subject to the price-list valid at any given time.
- The subscription's voice package does not include calls to normal-priced landline phone numbers.
- International usage outside the EU/EEA area is subject to the current normal listed roaming prices.
- Calls and message outside the EU/EEA countries are subject to the current normal listed roaming prices.
- For more information of internal call charges, please see telia.fi/matkalla
- Information about delivery fees and other charges can be found in the pricelist.

Limitations

Commercial use of the subscription is forbidden. Telia is entitled to intervene in any misuse in accordance with Telia's general delivery terms.

The subscription is intended for the use of personal customers, which is not considered to include automatic service use or service use by means of automatic systems. If the subscription is used for another purpose than a private individual's use, and the customer does not remedy their operations despite an objection, Telia is entitled to intervene in the misuse and block the use of the subscription or terminate the subscription. Any instances of misuse are dealt with case by case, and use of the subscription in animal trackers, for example, is not considered misuse.

Telia has the right to temporarily control network capacity in order to ensure that all customers enjoy a high-quality and fast user experience. This may involve, for example, controlling traffic during congestion of customers whose data use has exceeded the limit of reasonable use of 200GB, as referred to in the chapter Traffic management and data security, in accordance with Section 4.2. of Telia's General Delivery Terms for Consumer Customers concerning Services.

Monitoring of international use in the EU/EEA

Telia is entitled to monitor the use of subscriptions by traffic type (calls, messages and data) and their location in the EU/EEA countries, and to take action in case of potential misuse.

The following cases will be construed as misuse:

1. The subscription is located in other EU/EEA countries than Finland for more than two (2) months during a monitoring period of four (4) months, provided that, in addition,
2. More than 50% of the traffic of the subscription takes place in other EU/EEA countries than Finland during the monitoring period in question.

The customer will be warned of misuse by a text message requiring that the subscription should be used in Finland for seven (7) days within the next fourteen (14) days. If the requirement is not met, Telia has the right to charge an extra charge, by traffic type, for the above misuse of the subscription.

If the customer shows that the above conditions for the extra charge are not met, no extra charge will be invoiced.

Telia Rehti

service description

Quality of mobile services abroad

If the mobile subscription agreement includes the use of mobile services outside the home country, i.e. roaming, it is possible to use the same mobile services as roaming services in EU and EEA countries as in Finland (voice, messages, internet) that the EU or EEA roaming provider provides in its own network.

As a general rule, mobile services are available in the same quality (e.g., speed, latency, availability) as in Finland, but the quality of mobile services in the EU or EEA roaming provider's network may differ from the quality of Finnish mobile services. The quality available depends on the technological capability of the EU or EEA roaming provider's network, e.g., the EU or EEA roaming operator's network technologies (3G, 4G, 5G), network coverage, capacity, network security and operational requirements or differences caused by external reasons (e.g., topography of the country in question).

If the quality of mobile services of a roaming provider in an EU or EEA country differs significantly from the quality agreed in the mobile subscription agreement (e.g., deviation from the maximum speed of the subscription) and if deviations in the quality of the roaming service have a significant impact on the use of mobile services (e.g., a congested network slows down the downloading of large amounts of data, prevents video streaming, interrupts interactive services), you can report it to Telia, and we will investigate the matter.

Consumer customers

You can report a fault via chat or by phone

- Log in to Minun Telia and open the chat from the right side of the page.
- Call customer service on 020 690 400 (mobile call charge/local network change; queue time included) Mon–Fri 9 a.m. to 8 p.m and on Saturdays between 10 a.m. and 4 p.m

Changes

You can change your package and subscription type once (1) in an invoicing period. Such changes are subject to the applicable listed price.

Monitoring the use of the service and price information

To access information about the use of the service and the fees incurred, log into Minun Telia at telia.fi/kirjaudu (in Finnish), use the Minun Telia app or call Telia's customer service. Up-to-date price information is available at telia.fi and from Telia's customer service.

Operation of the web service

Your selected Surf package is provided at the highest speed available at any given time in view of the network load and the maximum capacity of the package. Therefore, an individual customer cannot be guaranteed a specific data transmission speed. Connection speeds depend, for example, on the Internet service, network technology, and the terminal device.

The availability of the service can be affected, for example, by an exceptional number of simultaneous network users. Due to network load, the Internet connection may briefly slow down essentially, become unstable or be interrupted. If the Internet connection is unstable or interrupted, files or parts of files may be lost, remain undelivered or arrive defective or faulty. This is characteristic of web services and does not entitle to compensations or damages. To use the internet service, you must have a terminal device that meets certain technical requirements, and you may also need to save the data transmission settings on your terminal device as instructed. Insofar as possible, Telia sends the appropriate settings to the customer's terminal device automatically by SMS when the customer inserts the SIM card related to the subscription into a new terminal device. The customer can also order the settings through Telia's self-service channels or customer service.

Telia Rehti

service description

Surf packages can be used abroad in the networks of operators that have a valid agreement with Telia. The service quality and features, however, may differ essentially from Telia's services in Finland.

By default, network address translation (NAT) is used in the service. Consequently, the service is not assigned a public, individual IP address and no data transmission connection from public Internet to the subscription can be established. By paying an extra charge, however, you can activate or adopt a public IP address, whereby a data transmission connection from the Internet to the subscription can be established. The subscription supports the IPv4 protocol but not the IPv6 protocol.

Traffic management and information security

Network traffic is managed on account of strong and often unforeseeable variations in traffic volumes, which may cause momentary congestion in different parts of the network. Traffic management mechanisms are used to ensure that critical services and applications continue to work reliably in cases of congestion.

As a rule, customer effects are small (for example, a momentarily lower data transmission speed or increased delay) and occur during peak congestion times. These effects are usually attributable to network problems or external disturbances, such as DoS attacks.

Traffic management methods include, for example, queuing, prioritization, restriction and signaling about the congestion to the customer's applications. The methods are automated, and their dynamic effects on each individual application cannot be estimated accurately and specifically. Network performance is constantly monitored and traffic flows optimised, and network capacity will be increased such that the effects of the traffic management on the customer are as small as possible, whatever the service or application.

If necessary on account of an exceptional information security threat or to ensure normal operation of the network, Telia may use traffic management methods that can affect the service user's applications, services or content or may be attributable to the recipient, sender or terminal device. This includes, for example, traffic filtering, which is used in DoS attacks, or temporary disconnection of the customer's service, for example in cases where a customer device causes significant problems or disturbance or where the service is used to transmit spam or malware. In addition, for reasons of service availability or filtering of malicious traffic or for another information security reason, Telia may temporarily restrict the use of the service either by preventing the use of certain communications methods (protocols) or ports or by temporarily disconnecting the web service of the subscription. Automated systems may be used to restrict traffic or temporarily disconnect Internet services.

The traffic management methods include, for example, restriction of network usage based on court order in order to block access to network services used for unauthorized distribution of content protected by copyright. Such restrictions may be implemented in such a manner that the user's access to network addresses will be blocked or that addresses of some network servers will not be transmitted to the service user from Telia's domain name service. The traffic management methods also include port blocks to prevent abuse of vulnerabilities in the service user's terminal devices.

Connecting a terminal device to the public Internet and installing applications involve threats (for example, viruses and other malware) that may impair communications or jeopardize the availability and/or confidentiality of the data on the terminal device. The customer shall attend to the protection and information security of the device. The customer can improve data security by means of data security services.

Insofar as possible, Telia communicates any information security matters and changes to the rules of use on Telia's website at telia.fi/tietosuoja.

New security threats appear continuously, and an up-to-date list of traffic management methods and methods used to ensure information security is available at telia.fi/tietoturvainfo.

TELIA REHTI SERVICE DESCRIPTION

You can check the network technologies available in your region and their estimated maximum speeds at telia.fi/kuuluuus.

The data transmission rate is also affected by the technology of the equipment in use. Consult the hardware manufacturer's instruction manual for the network features supported by your device.

2G: This is often shown with the G or GPRS icon in the device. This is the slowest and oldest of connection technologies. The speed is sufficient for using text-based services and slow loading of mobile-optimized pages. If the device is showing the E symbol, the technology is EDGE, slightly faster than GPRS. With this technology, mobile-optimized pages load slightly faster. Images will load slowly.

4G/LTE: 4G is better suited to telecommuting, fast video playback and downloading larger files.

4G+/LTE+: Many modern devices can use the latest and fastest version of 4G. The speed can be up to triple the speed of a normal 4G connection. This network technology is well suited for efficient telecommuting or playing back high-definition video. This technology is currently available more extensively in select urban areas.

5G: You can make use of the latest 5G connections when you are using a device and mobile subscription that support 5G. The use requires that you are within the coverage area of the 5G network. 5G connections will be several times faster than 4G connections and are particularly suitable for viewing top-quality video and for playing. The use of the 5G technology is only just beginning, and therefore its availability is limited to certain urban areas.

Telia Rehti

service description

Invoicing and payment methods

The subscription is subject to the charges indicated in the price list valid at any given time. If you change your subscription type to Rehti, the change is effective immediately and the Rehti pricing plan and selected Surf package become immediately applicable. Any calls, messages and data used before the subscription type change are charged based on the price list for the first subscription type. The monthly subscription charge is charged in periods of about one month in accordance with your invoicing group.

The payment option for the subscription and any telecommunications services used with it is invoice, paid by wire transfer. The term of payment is 14 days. You can find the due date on the invoice.

If you opt for electronic invoicing, invoicing is free of charge. Printed invoices are subject to the current listed price.

The period of notice applied to the subscription is two (2) weeks. The final invoice will be charged on a day-to-day basis until the date of expiry, unless the subscription is terminated to expire at the end of the invoicing period. You can end a fixed-term contract by paying the early termination charge in accordance with the price list. In addition, the final instalments of a device purchased under a fixed-term equipment contract must be paid as a lump sum.

Customer support and complaints

Telia's customer support is available on 020 690 400 on business days between 9 a.m. and 8 p.m. and on Saturdays between 10 a.m. and 4 p.m. (mcc/lnc). For fault reports, the service hours are on business days between 10 a.m. and 4 p.m. and on Saturdays between 9 a.m. and 4:30 p.m. You can also file a fault report online at telia.fi/asiakastuki/viat-ja-hairiot/hairioilmoitus (in Finnish). In urgent cases (e.g., requesting a PUK code or blocking the subscription), our customer care chat is available 24/7 after logging into Minun Telia, or via the Minun Telia app. You can also submit a contact request at telia.fi/asiakastuki/lomakkeet/yhteydenottopyynto (in Finnish). You can also send customer complaints by mail to Pasilan asema-aukio 1, 00520 Helsinki.

Supplementary services

The parallel subscriptions of the Yhteys Multi service use and consume the voice, message and surf packages of the Telia Rehti subscription. The parallel subscriptions of the Yhteys Multi service are restricted to operating in 2G and 4G networks only. A parallel subscription of a Multi+ 5G service also works in the 5G network. The maximum speed of a parallel subscription of an Yhteys Multi service is specified in the service description of the Yhteys Multi service. Yhteys Multi services are invoiced in accordance with the current pricelist.

Products and services suitable for people with disabilities

The voice, Internet connectivity and data transfer services provided by Telia do not have specific features intended for disabled end-users. Because of the nature of the services, special features are practically impossible to implement in them. The features of the terminal devices play key role in the accessibility of Telia services. Accessories and assistance software for devices, customized to the needs of each customer group make using Telia's services fluent. Information regarding these accessories and applications is available from organizations for people with disabilities.

Processing of personal and traffic data

Personal data required before the conclusion of an agreement

Before an agreement is concluded and while it is being prepared, the following data are required for the conclusion of the agreement and for uniquely distinguishing and identifying the customer:

- Name and contact information
- Personal identity number

Telia Rehti

service description

- The identity can be verified with a proof of identity or by means of strong electronic authentication or by using another means, depending on the channel of contact

In addition, in order to assess the creditworthiness of the customer, information may be required in relation to the customer relationship and payment behaviour, and the necessary information reflecting the creditworthiness may be acquired from external sources.

Personal and traffic data collected while using the service

When using the service, the customer's personal data is collected, such as contact details or other information provided while communicating with Telia, or data related to customer communication and marketing as well as to the agreement, complaints, invoicing and payments. These data may be collected and updated from the customer. The data to be collected may be generated in connection with communicating with Telia or using the service, and the data may be updated and collected from external sources, such as the population information system or Finland Post's systems.

Furthermore, information concerning the use of and invoicing of the service, as well as communications traffic data, such as information concerning communications transactions and the parties, location, time and devices involved with the communication will be processed while using the service.

More information regarding the processing of personal and traffic data

More information regarding the personal and traffic data collected and processed, the grounds for processing, the customer's rights with respect to the processing of the data, and contact details can be found in Telia's privacy notice and in the service-specific privacy notices, if any. These are available on Telia's website at telia.fi/tietosuoja and at Telia's offices.

Other terms and conditions

Due to the technical implementation of the data processing, some data may be located on servers of Telia's external subcontractors and processed over a technical connection. Data will not be transferred outside the EU or EEA areas, unless it is necessary for the provision of the service.

Any issues not mentioned in this service description are subject to Telia's General Delivery Terms for Consumer Customers concerning Services, valid at any given time.

EU/EEA countries*: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, France, French Guiana, Germany, Gibraltar, Greece, Guadeloupe, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Martinique, the Netherlands, Norway, Poland, Portugal, Reunion, Romania, Slovakia, Slovenia, Spain, and Sweden.

Telia Company networks:** Sweden (Telia), Norway (Telia), Estonia (Telia), Latvia (LMT) and Lithuania (Telia).

Nordic and Baltic countries*:** Sweden, Norway, Denmark, Estonia, Latvia and Lithuania

Telia Company countries**:** Finland, Sweden, Norway, Estonia, Latvia and Lithuania.
