OTHER FACILITIES

You can also rent other facilities at our data centres for a variety of different needs.

Secure room

A security-classified space where sensitive material can be processed and stored. The premises are designed particularly for the needs of the public sector.

Classified facilities

A colocation facility for security-classified needs.

Office premises

A workspace in a shared office space.

Storage space

A customer-specific storage space, or space in a shared storage room

Meeting facilities

A meeting room equipped with AV technology.

NETWORK CONNECTIONS

Telia offers you wide range of networking services including internet services, private networking and carrier services. Our data center is carrier neutral and also other carriers are present.

LOCATION

Telia Helsinki Data Center is located in Pitäjänmäki, Helsinki, with excellent transport access. The area is a hub for IT businesses and is easy to reach from both Helsinki Airport and Helsinki city center.

SECURITY

Security is ensured by access control, 24/7 security guarding and recording camera surveillance. Our data center provides facilities with difference security levels. Physical access can be controlled at personal level for every individual cabinet.

POWER SUPPLY AND BACKUP

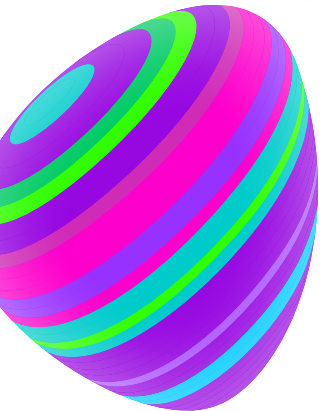

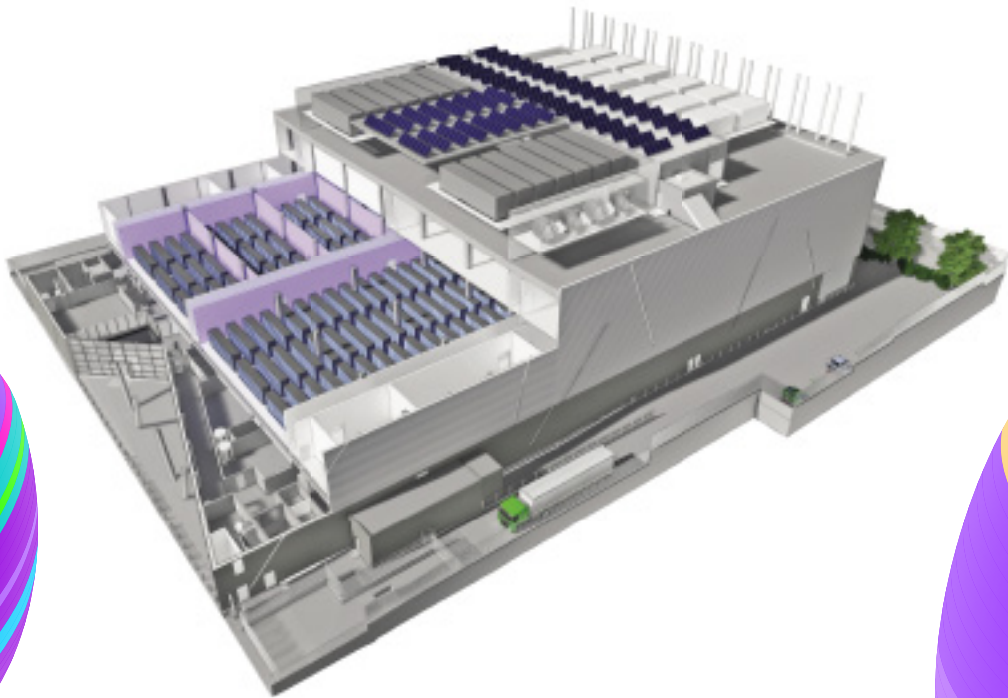

We use carbon-free electricity, mostly produced from renewable energy sources. Uninterrupted power supply is guaranteed by a modular UPS system and an automatically triggered backup power system.

COOLING

Our colocation facilities feature an energy-efficient and redundant cooling system that keeps the conditions in the premises stable.

FIRE PROTECTION

The premises are protected by an automated fire extinguishing system. Alarms are forwarded to our operations center 24/7.
